## Welcome to the server for the introduction week of the summer semester 2020/2021!

The server is intended to provide a platform for our orientation events, where you can exchange ideas with other first-year students and ask questions to (more or less) experienced students. To make sure that all this works well, here are a few hints and tips:

1. Please use the name with which you would like to be addressed at the university (you can change your nickname especially for this server. On a PC you can change your nickname by right clicking on your name in the sidebar on the right side of the screen and choosing "Change nickname". On a cell phone you have to swipe to the right, then you see all channels and at the top the name of the server, next to the names are three dots, if you click on them you get to the server settings and can also change your nickname).
2. Please read and follow our rules of conduct. You can find them in the `#rules` channel.
3. Roles: On the server there are different roles with different functions:
  - Organizer: These crazy individuals are the main responsible for the organization and execution of this Ophase
  - Management: These nice people have taken over the responsibility for one or more organizational parts of the Ophase
  - Helper: People who are not primarily responsible, but who help with many tasks
  - Discord-Server-Admin: The des Discord admin team
  - M.Sc. Fresh\*: People who are starting their first Master's semester in Computer Science this semester, plus an extra role that characterizes the specific Master's program
    - General Computer Science
    - Autonomous Systems
    - Distributed Software Systems
    - IT-Security
    - Internet- and Web-based Systems
    - Visual Computing
4. The *CyberPretix* bot handles the role assignment in case you signed up in our Pretix and entered your Discord-ID.
5. Roll assignment:
  - If you signed up on our Pretix and entered your discord-ID, the CyberPretix-bot should assign you the matching roles.
  - If that is not the case, the CyberPretix-bot will contact you and lead you through a workflow to assign you roles.
  - If that does not work, please write a short message in the `#role-assignment` Channel, in which you state your field of study and whether you participate in the programming precourse, then our team will handle the role assignment. Two notes on that:
    - Please keep your messages brief in the `#role-assignment` channel, it might become crowded
    - If it is crowded, it might also take some time until you get your roles
6. Addressing roles: with `@role` you notify all people who have these roles – but not all roles have the right to mention all others.
7. If you have questions or problems with the server, please contact the discord admins in the `#serverfeedback` channel. Suggestions for improvement should also be posted there.

**We wish you a lot of fun in the introduction week and much success in your studies!**
